

ABDULAZIZ ARNOUS

IT Support & Automation Specialist

Makkah, Saudi Arabia • +966 531 577 741 • 1898.a9@gmail.com • linkedin.com/in/abdulaziz-arnous

PROFESSIONAL SUMMARY

IT Support and Automation Specialist with hands-on experience in hardware setup, network connectivity, and Linux server configuration — including commissioning an IoT environmental-monitoring system for a temperature-critical cold-storage facility during the Hajj season, covering sensor integration, local server setup, alarm verification, and live-dashboard validation. Combines core IT support strengths with advanced Python automation: builds end-to-end workflows integrating REST APIs, AI/LLM services (Anthropic, OpenAI), web scraping (Playwright), and Linux/VPS administration. Fluent in Arabic, English, and Turkish. Seeking IT Support, Technical Operations, or Automation & Integration roles in Makkah, Jeddah, or remote.

TECHNICAL SKILLS

IT Support & Help Desk: Hardware/software troubleshooting, Windows 10/11, end-user & remote support, ticketing, on-site deployment, technical documentation
Operating Systems: Windows 10/11, Windows Server, Linux (Ubuntu / VPS)
Networking: TCP/IP, DNS, DHCP, Cisco router & switch basics, network printer configuration, Wireshark
Automation & Scripting: Python, Bash, n8n, REST API integration, workflow automation, web scraping (Playwright)
AI & Integration: LLM / AI API integration (Anthropic, OpenAI), prompt engineering, document & media automation (FFmpeg)
Server Operations: SSH, process management (pm2), task scheduling (cron), uptime monitoring
Databases & Web: SQL Server (query writing, filtering, conditional retrieval); HTML, CSS, React, Git, Microsoft 365, Active Directory, Remote Desktop

PROFESSIONAL EXPERIENCE

IoT Monitoring & IT Systems Technician — *Ministry of Health, Hajj-Season Project* Makkah, Saudi Arabia • 2024

- Commissioned and verified an IoT environmental-monitoring system for a temperature-critical cold-storage facility (6 rooms, dozens of refrigerated units), where continuous temperature and humidity control is essential.
- Installed temperature/humidity sensors and integrated third-party cold-storage equipment with a purpose-built local server and centralized live-monitoring dashboard.
- Configured the server and validated end-to-end data flow — confirming accurate live readings, a functioning temperature-alarm system, and correct online connectivity across all sensor nodes.
- Operated under high-pressure, time-critical conditions during peak Hajj season.

Public Relations & Digital Coordinator — *Gulf Palm Contracting Establishment* Saudi Arabia • 2022

- Managed structured data entry and documentation systems, processing 500+ records monthly.
- Built Excel-based financial and operational reports, reducing manual reporting time by 40%.
- Coordinated digital workflows and administrative processes to improve team efficiency.

SELECTED TECHNICAL PROJECTS

AI Prompt-Book Product (PROMID) — *Founder & Developer* Independent • 2025 – Present

- Designed and built a 250-prompt bilingual (Arabic/English) AI product with an automated PDF & HTML generation pipeline (Playwright + Chromium) producing a 265-page deliverable with 450 functional internal links.
- Developed a Python toolkit for automated content injection, asset management, and quality auditing; produced marketing video assets via an automated FFmpeg rendering pipeline.

Automated E-Commerce Content Pipeline — *Developer* Independent • 2025 – 2026

- Built an end-to-end Python system that discovers product deals, matches product identity via semantic similarity (SBERT) and barcode (EAN/GTIN) verification, captures live pricing, and auto-publishes formatted posts.
- Deployed and maintained on a Linux VPS using pm2, cron, structured logging, and price-drift detection.

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Information Systems — Near East University, 2021
CompTIA A+ — In Progress (Expected 2026) • **Cisco CCNA** — In Progress (Expected 2026)
Languages: Arabic (Native) • English (Fluent) • Turkish (Fluent)
