

ABDULAZIZ ARNOUS

IT Support & Automation Engineer

Makkah, Saudi Arabia | +966 531 577 741 | 1898.a9@gmail.com | linkedin.com/in/abdulaziz-arnous

PROFESSIONAL SUMMARY

IT Support and Automation Engineer with hands-on experience in hardware troubleshooting, Windows deployment, and network diagnostics in high-demand environments — including a Hajj-season operation at the Ministry of Health serving **10,000+ daily users** across 200+ devices and 50+ IoT sensors at 99% uptime. Combines core IT support strengths with advanced Python automation: builds end-to-end pipelines integrating REST APIs, AI/LLM services (Claude, OpenAI), web scraping (Playwright), and Linux server administration. Fluent in Arabic, English, and Turkish. Seeking **IT Support, Technical Operations, or Automation Engineering** roles in Makkah, Jeddah, or Remote.

TECHNICAL SKILLS

IT Support & Help Desk: Hardware/software troubleshooting, Windows 10/11, end-user & remote support, ticketing

Networking: TCP/IP, DNS, DHCP, Cisco router & switch basics, Wireshark, network printer config

Operating Systems: Windows 10/11, Windows Server, Linux (Ubuntu / VPS)

Databases: SQL Server — query writing, filtering, conditional retrieval

Automation & Scripting: Python, Bash, n8n, REST API integration, Playwright, web scraping

AI & Integration: LLM/AI API (Anthropic Claude, OpenAI), prompt engineering, FFmpeg pipelines

Server & DevOps: SSH, pm2, cron, uptime monitoring, process management

Tools: Git, Microsoft 365, Active Directory, Remote Desktop, HTML/CSS, React

PROFESSIONAL EXPERIENCE

IoT & IT Systems Technician

2024

Ministry of Health — Hajj Emergency Hospital, Mina

Makkah, Saudi Arabia

- Installed and configured **cooling and humidity IoT sensors** at the Mina Emergency Hospital (Hajj season), integrating all units with a central server and live monitoring dashboard.
- Managed end-to-end connectivity between sensor nodes, local server, and remote operator — ensuring real-time environmental data visibility across the facility.
- Presented the complete technical project to the **Ministry of Health Director** at both the Riyadh headquarters and Al-Zaher building in Makkah.
- Operated under high-pressure, time-critical conditions during peak Hajj season with zero system downtime during the presentation period.

Public Relations & Digital Coordinator

2022

Gulf Palm Contracting Establishment

Saudi Arabia

- Managed structured data entry and documentation systems, processing **500+ records monthly**.
- Built Excel-based financial and operational reports, **reducing manual reporting time by 40%**.
- Coordinated digital workflows and administrative processes across teams.

SELECTED TECHNICAL PROJECTS

PROMID — AI Prompt-Book Product

2025 – Present

Founder & Developer · Independent

- Designed and built a 250-prompt bilingual (Arabic/English) AI product with an automated PDF & HTML generation pipeline (Playwright + Chromium) producing a **265-page deliverable** with **450 functional internal links**.
- Developed a Python toolkit for automated content injection, asset management, and quality auditing.
- Produced marketing video assets via an automated **FFmpeg rendering pipeline**.

Automated E-Commerce Content Pipeline

2025 – 2026

Developer · Independent

- Built end-to-end Python automation: product deal discovery, **SBERT semantic matching**, **EAN/GTIN barcode verification**, live multi-platform price capture, and auto-publishing of formatted social media posts.
- Deployed on Linux VPS using **pm2**, **cron**, structured logging, and price-drift detection — running continuously in production.
